Startup, Inc - Frontend Developer Intern

June 2023 - December 2023

- Collaborated with team members using version control systems such as Git to organize modifications and assign tasks.
- Assisted in building the front-end of web pages making them user friendly and interactive.
- Collaborated with back-end devs using APIs to fetch data and make post request

Toptal - Frontend developer

January 2024 - Present

- Worked remotely as front end developer with enterprises, start ups etc. Creating interactive and user-fveloperriently web apps, fixing bugs and maintenance of code

Projects

Food Ordering Web App With Payment | React, TypeScript, JSON

April, 2024

- Developed an interactive and fully responsive food ordering web app with cross browser compatibility
- Integrated Paystack Payment into the web app, allowing users to make payment seamlessly
- Utilize Local Storage for users cart items so that users will not lose selected items when the page is refreshed

IP Address Tracker | React, LeafletJS, Typescript, AP

February, 2024

- Created a search functionality that queries the API based on users input of IP address
- Enable page to detect and display public ip address of users location

Countries Info App | React, JavaScript, API

November, 2023

- Created a web application where users can search for countries around the globe and as well see information about the country of their choice
- Made the page adaptable across different screen sizes and compatible across all browsers.
- Created a search and filter functionality where user can search for a country by name and also filter countries by continents
- Created theme-context to enable user to toggle between light and dark mode
